

CDC Praxa's

Content Management Solutions

Maximising Your Information Asset

Effectively managing an organisation's information asset is one of the core prerequisites in increasing its business value and appeal. The ability to maintain and easily gain access to valuable corporate information and knowledge would improve organisation productivity and operation while reducing running costs. CDC Praxa has been successfully helping corporate and government organisations streamlining and securing their everyday business information asset since 1982, optimising and extending their operational content resources and processes while ensuring legislative compliance. A good content management solution is more than just providing deployment, management and system administration services and know-how. CDC Praxa's depth and breadth of experience in content management means an organisation can gain valuable business insight and deliver significant competitive advantage through automate business workflow to accelerate team collaboration and decision making while enhancing customer relationship through effective information sharing throughout the organisation whether it is through intranet, extranet and/or internet applications.

Partnership Collaboration

CDC Praxa partners with some of the world's leading information technology solutions providers to connect, integrate and advance organisations' information assets. **CDC Praxa's Solution
Saves Rocla More Than
\$300,000 A Year!**

CDC Praxa, together with Technology Partner Microsoft helped Rocla maximised their information asset and workflow while streamlined their operation by designing and implementing a new test scheduling system based on Microsoft Office InfoPath 2007 and Microsoft Office SharePoint Server 2007. The solution improved their lab operation with better use of lab resources, enabling quicker project turnaround and taking their product to market quickly and more competitively with a potential savings of \$300,000 a year!

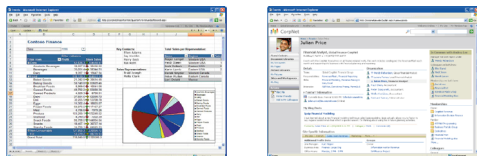

Microsoft® Office SharePoint 2007

The Comprehensive Content Management Solutions

CDC Praxa and Microsoft® Office SharePoint 2007 can help improve organisational efficiency by providing intuitive content management and enterprise searches, speeding shared business content and processes while facilitating information-sharing across the organisation for better business insight. Accessing and utilising relevant business information are vital to the effective management and efficiency of an organisation and SharePoint 2007 can integrate content and processes, improve business insights, simplify internal and external collaboration and provide IT professionals and developers with the platform and tools they need for server administration, application extensibility, and interoperability.

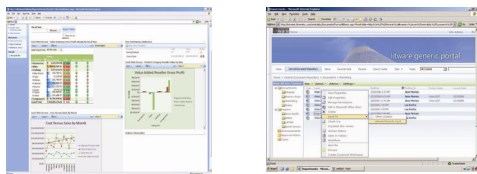

Streamlining and extending everyday business processes across the organisation with familiar client desktop applications, email and web browsers to provide a consistent user experience that simplifies how people interact with content, processes and business data

SharePoint 2007 Feature Areas:

1. Collaboration
2. Portal
3. Enterprise Search
4. Content Management
5. Business Forms
6. Business Intelligence

Why SharePoint?

- ✓ Provide a simple, familiar, and consistent user experience.
- ✓ Boost employee productivity by simplifying everyday business activities.
- ✓ Help meet regulatory requirements through comprehensive control over content.
- ✓ Effectively manage and repurpose content to gain increased business value.
- ✓ Simplify organisation-wide access to both structured and unstructured information across disparate systems.
- ✓ Connect people with information and expertise.
- ✓ Accelerate shared business processes across organisational boundaries.
- ✓ Share business data without divulging sensitive information.
- ✓ Enable people to make better-informed decisions by presenting business-critical information in 1 central location.
- ✓ Provide a single, integrated platform to manage intranet, extranet & Internet applications across the enterprise.
